

Rowan Class and Saturn Class Home Learning: Wednesday 8th September 2021

The following plan is based on the fifth day back after the summer holidays.

Theme: **Sharing a vision for our future**

Activity 1: (Extension task from yesterday)	<i>You may have completed this yesterday; if so, please move onto activity 2.</i> You need to engage with and convince others of the importance of green spaces and being an environmental activist. Produce a presentation that can be shared with others that will convince others to take action. <i>This could be as simple as getting people to plant more plants and trees.</i> Provide crucial information, by expressing the urgency of action required (exemplified by Attenborough).
Activity 2:	Create/Design a placard to protest against the lack of green space in certain urban areas. You need to promote the importance of green spaces in all areas of the country to provide variety for different communities.
Activity 3:	Write a short chant that could be repeated during a friendly protest march. You would need to repeat this chant while you hold your placard while walking down built up areas. <i>In school we are completing a similar task as a role play activity on the school field.</i> Feel free to video your solo march protest in your back garden and upload to Tapestry or email to the school office.
Activity 4:	At the start or end of a protest, often a spokesperson rallies the crowd to motivate them for the march. You need to write a short and persuasive speech that shares your vision for the future and the importance of having green spaces. If you wish, you could video your speech and upload to Tapestry or email to the school office.

Extra activities:	English	Maths
	Take an accelerated reading quiz on a book that you have read recently at home. Read for pleasure outside in the garden or a quiet place inside. Write a book review of your favourite book to share with others.	Spend some time using some online maths resources: Hit the Button - Quick fire maths practise for 6-11 year olds (topmarks.co.uk) KS2 Maths - BBC Bitesize Daily 10 - Mental Maths Challenge - Topmarks Connect 4 Factors (transum.org)
