

Jupiter and Oak Maths Plan Week Commencing 8th November 2021.

Monday	Tuesday	Wednesday	Thursday	Friday
LO: To subtract two 3-digit numbers (Practical).	LO: To subtract two 3-digit numbers (exchange).	LO: To estimate the answer to a calculation.	Nrich activities	Please complete one hour on MathsWhizz.
In this lesson we are going to be using practical resources to practice exchanging when subtracting two 3-digit numbers.	Using our learning from last lesson, we are going to be using written column method to solve subtraction questions.	In this lesson we are looking at estimating.	As this is our last lesson looking at our unit of addition and subtraction, we are completing some problem-solving activities to consolidate our learning.	
Work through the PowerPoint to see how to subtract these numbers.	Work through the PowerPoint to remind yourself how to do this.	Watch the White Rose video Aut3.8.3 - Estimate answers to calculations on Vimeo	Choose three activities to complete. Remember to use physical resources and what you have learnt this term to help you.	
Using the question sheet, can you practically make the numbers and remember to exchange ten 1s for a 10s stick, or ten ones for 100. Take pictures for evidence.	First complete the column method worksheet.	First complete the worksheet.		
Take pictures for evidence.	Then complete extension worksheet.	Then when you have completed this, work through the problem-solving activity. Choose the level you are most comfortable with.		
Please submit your work through Tapestry.
