

12.10.21

LO: To subtract a 1-digit number from a 3-digit number (crossing 10).

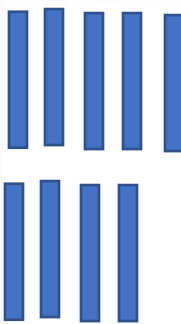

P	I can	C T
	I can accurately make 3 digit numbers, showing the place value of each digit.	
	I can exchange place value to work out subtraction questions.	
	I can show my working out using a place value chart.	

For each question, use the place value chart to show your working out. **Remember** - when you are exchanging a 10, you need to cross out a 10 and draw ten 1's in the 1 column. If you are exchanging a 100, you need to cross out a hundred then draw ten 10s in the 10 column. You need to exchange before you work out your answer. For some questions, you will need to complete the PVC first.

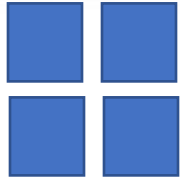

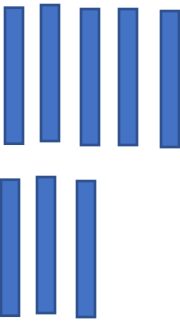

Q1. $374 - 9 =$

HUNDREDS	TENS	ONES
		

Q3. $293 - 7 =$

HUNDREDS	TENS	ONES
		

Q2. $481 - 8 =$

HUNDREDS	TENS	ONES
