

DT

LO: To evaluate our painted divas.

We made and painted our divas to take home for Mother's Day.

Ask your class teacher to send you a picture of your completed diva so that you can evaluate it.

Did your diva look like your design? What do you think worked well? What did you find tricky? If you could make your diva again, what would you do differently?

RE

LO: To be able to orally retell the story of Easter and understand the key symbols.

Use the attached Easter Story and Easter Symbols PowerPoint to refamiliarize yourself with the story of Jesus and Easter. Can you either write down a summary of the story of Easter or get a grown up to film you retelling the story.

Complete the Easter Symbols activity, choosing the difficulty level that suits your understanding.

SCIENCE

LO: To recount the life of someone famous from Britain who lived in the past who had an impact on our lives today.

Work through the PowerPoint introducing John McAdam and think about his invention.

How did his invention impact on life today?

Create a fact file on John McAdam and make sure you include interesting facts about his invention.

TOPIC

This term our topic has been all about India! To celebrate all our learning about the topic, we would like you to come up with a poster with everything you have learnt/know about India. Remember to look back at your home learning work to help you with this.

Use Espresso to help with research.

Make sure your poster is colourful and eye catching!

BONUS

On Thursday it is Reward Day! As this term has been challenging, spend some time completing some activities that make you feel happy! This could be Easter baking, colouring or completing the Easter activity book.
