

Level 1

LO: To be able to use a materials properties to explain why it is suitable or unsuitable for an everyday object.

Comparing Suitability of Everyday Materials

Match the objects and material you think is most suitable for them to be made from. Draw a line connecting the object with the material. Some objects could be connected to more than one material.

Object

Material

mirror

wood

coat hanger

glass

pillow

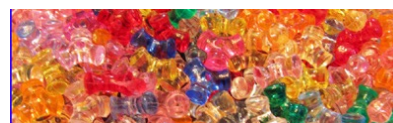

metal

rabbit hutch

fabric

chair

plastic

house

brick

Which material do you think would work best for a pillow case? Why do you think this? Can you explain why using the properties of the material?
