
(enquiry question)

In this investigation, we wanted to find out if our _____ parts grow as we get _____. To do this, we tested two different body parts: our _____ and our _____.

In our first scatter graph, we used stickers to show everyone's _____. The information at the bottom told us when everyone was _____.

The stickers showed us that the _____ size did/didn't go up as the children got older.

In our second scatter graph, we used stickers to show how _____ our _____ were. We measured our hands using a _____ and used _____ as our unit of measurement.

The stickers showed us that length of our hands did/didn't go up as the children got older.

Overall, I think that our investigation showed that _____

_____.
