

Making equal groups

Make group 2 equal to group 1 by drawing missing counters. One has been completed. Can you write number sentences to represent the arrays.

Group 1	Group 2	Make equal
		
		
		
		
		
		
		

Make arrays

Complete the arrays then write number sentence to represent the finished array.

Array	Number sentence
	$5 + 5 + 5 + 5 = 20$ or $4 + 4 + 4 + 4 + 4 = 20$
	
	
	
	
	
	

Grouping

Select a task card and use counters to help complete the following problems.

There are 20. We need 5 in each group. How many groups?	There are 25. We need 5 in each group. How many groups?	There are 20. We need 2 in each group. How many groups?
There are 16. We need 2 in each group. How many groups?	There are 12. We need 3 in each group. How many groups?	There are 21. We need 3 in each group. How many groups?
There are 30. We need 10 in each group. How many groups?	There are 18. We need 2 in each group. How many groups?	There are 35. We need 5 in each group. How many groups?

Equal groups:

There are _____ altogether.

There are _____ in each group.

There are _____ groups.

Sharing

Draw counters to represent the equal groups
The first one has been completed for you.

Share 8 into 2 equal groups 	Share 24 into 4 equal groups	Share 18 into 3 equal groups
Share 12 into 3 equal groups	Share 24 into 2 equal groups	Share 16 into 4 equal groups
Share 20 into 4 equal groups	Share 9 into 3 equal groups	Share 18 into 2 equal groups
