

## Varied Fluency Tenths as Decimals

### Developing

1a.  $\frac{3}{10}$  and 0.3

2a. 8 tenths

3a. The 2<sup>nd</sup> increment after 0;  $\frac{2}{10}$

4a. 0.6 is the odd one out.

### Expected

5a.  $\frac{4}{10}$  and 0.4

6a. 0.8

7a. The 7<sup>th</sup> increment after 0;  $\frac{7}{10}$

8a. 0.5 is the odd one out.

### Greater Depth

9a.  $\frac{7}{10}$  and 0.7

10a. 0.9

11a. The 4<sup>th</sup> increment after 0.3;  $\frac{7}{10}$

12a. 0.8 is the odd one out.

## Varied Fluency Tenths as Decimals

### Developing

1b.  $\frac{5}{10}$  and 0.5

2b. 4 tenths

3b. The 9<sup>th</sup> increment after 0;  $\frac{9}{10}$

4b. 0.1 is the odd one out.

### Expected

5b.  $\frac{6}{10}$  and 0.6

6b. 0.6

7b. The 3<sup>rd</sup> increment after 0;  $\frac{3}{10}$

8b. 0.2 is the odd one out.

### Greater Depth

9b.  $\frac{5}{10}$  and 0.5

10b. 0.4

11b. The 4<sup>th</sup> increment after 0.5;  $\frac{9}{10}$

12b. 0.1 is the odd one out.
