

Perimeter of Rectilinear Shapes

Perimeter of Rectilinear Shapes

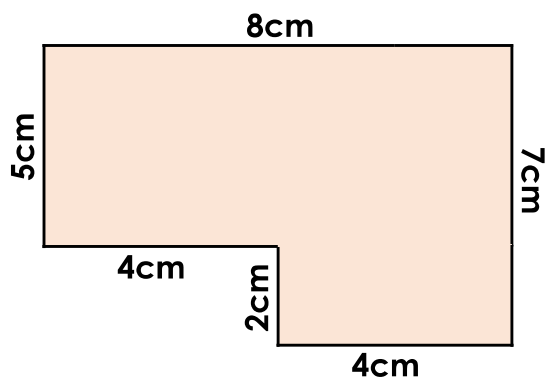

1a. Calculate the perimeter.

Not to scale

VF

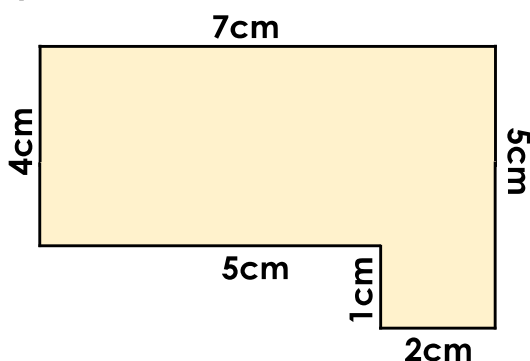

1b. Calculate the perimeter.

Not to scale

VF

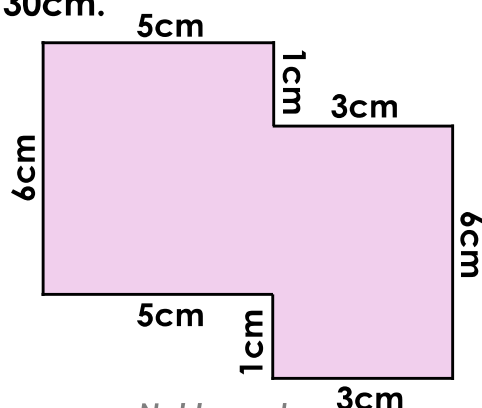

2a. True or false? The perimeter of the shape is 28cm.

Not to scale

VF

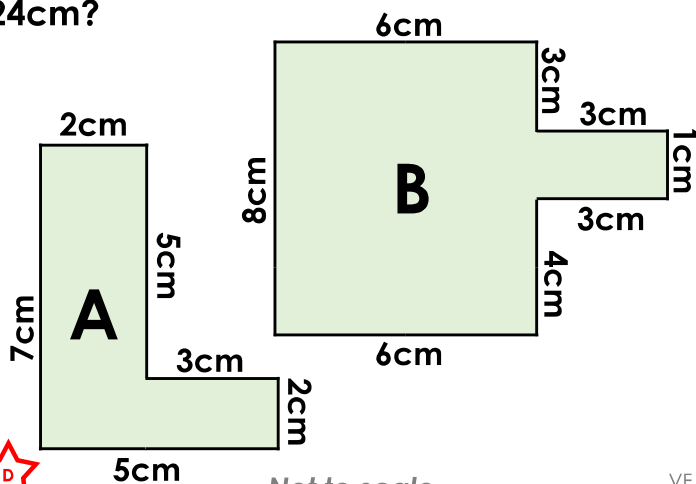

2b. True or false? The perimeter of the shape is 30cm.

Not to scale

VF

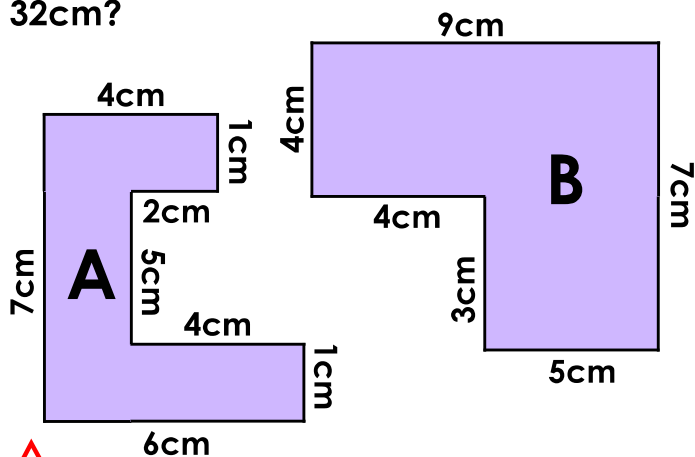

3a. Which shape has a perimeter of 24cm?

Not to scale

VF

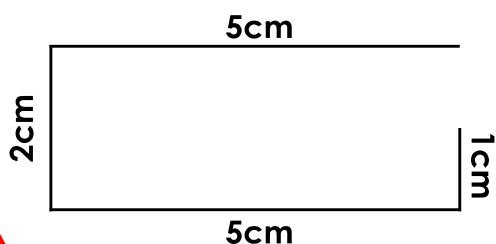

3b. Which shape has a perimeter of 32cm?

Not to scale

VF

4a. Complete the rectilinear shape so that it has a perimeter of 20cm.

VF

4b. Complete the rectilinear shape so that it has a perimeter of 18cm.

5a. Find the missing measurements and calculate the perimeter.

Not to scale

VF

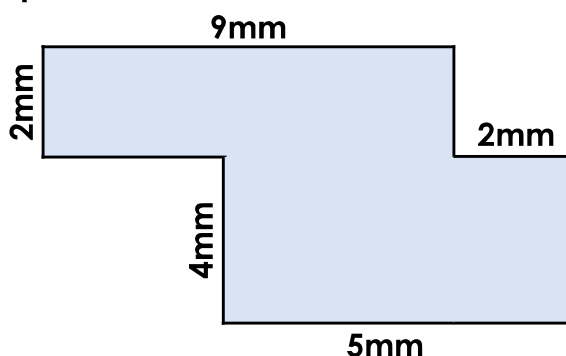

5b. Find the missing measurements and calculate the perimeter.

Not to scale

VF

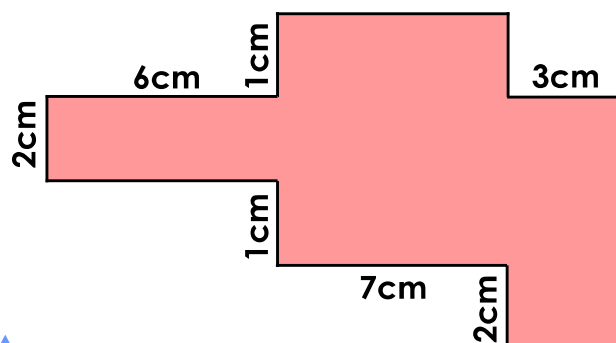

6a. True or false? The perimeter of the shape is 22mm.

Not to scale

VF

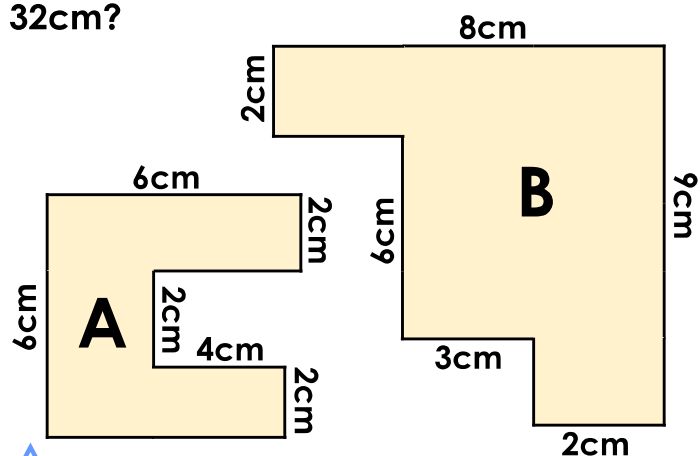

6b. True or false? The perimeter of the shape is 46cm.

Not to scale

VF

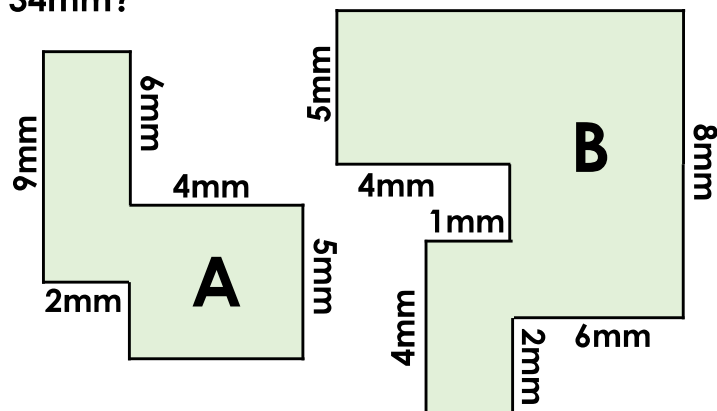

7a. Which shape has a perimeter of 32cm?

Not to scale

VF

7b. Which shape has a perimeter of 34mm?

Not to scale

VF

8a. Draw a compound rectilinear shape with a perimeter of 18cm.

VF

8b. Draw a compound rectilinear shape with a perimeter of 24cm.

9a. Find the missing measurements and calculate the perimeter.

Not to scale

VF

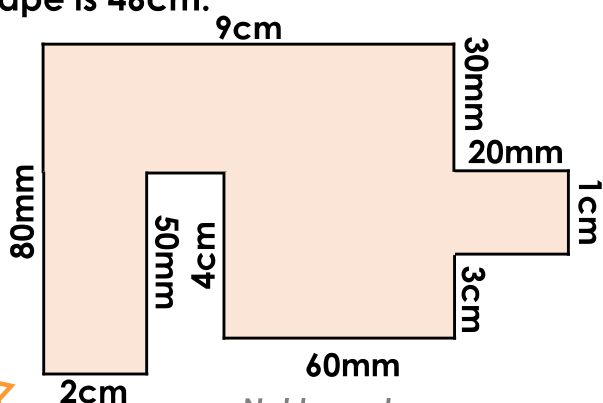

9b. Find the missing measurements and calculate the perimeter.

Not to scale

VF

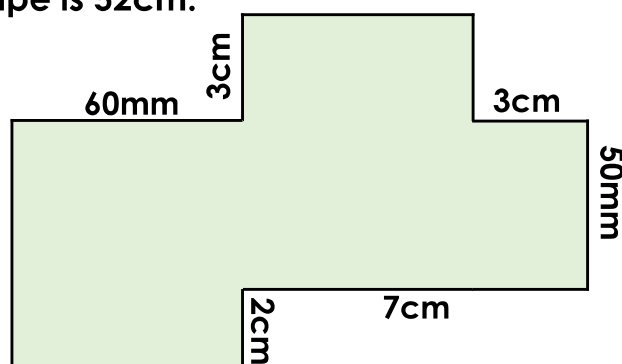

10a. True or false? The perimeter of the shape is 46cm.

Not to scale

VF

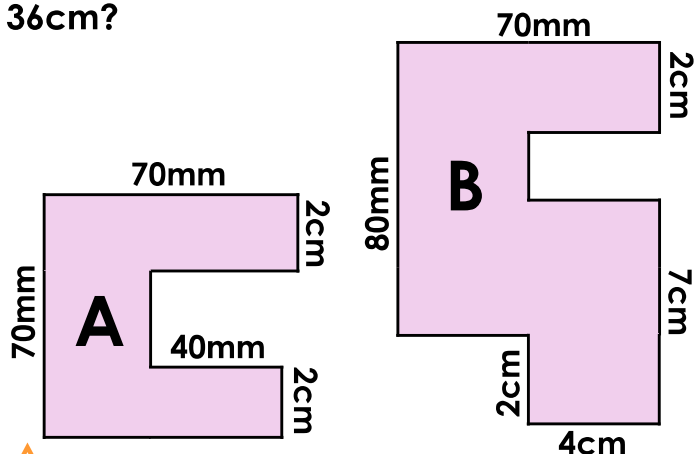

10b. True or false? The perimeter of the shape is 52cm.

Not to scale

VF

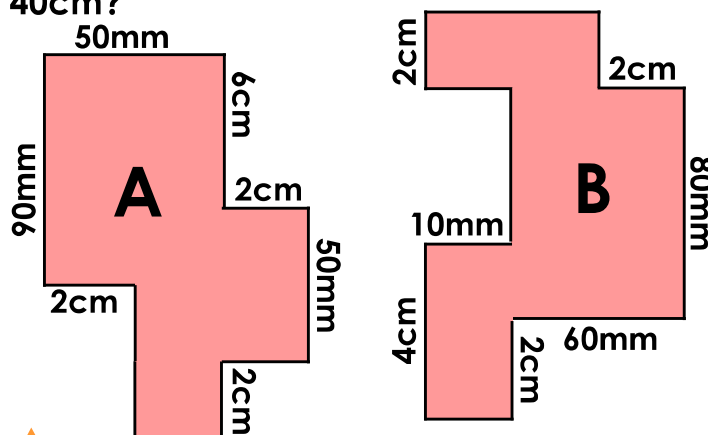

11a. Which shape has a perimeter of 36cm?

Not to scale

VF

11b. Which shape has a perimeter of 40cm?

Not to scale

VF

12a. Draw a compound rectilinear shape with a perimeter of 30cm which has 8 sides.

VF

12b. Draw a compound rectilinear shape with a perimeter of 22cm which has 10 sides.

VF
