

For each equation list all the possible values of x and y

Equation	No. of possible values of x and y
$7x + 5y = 94$	3
$3x + 8y = 100$	4
$5x + 9y = 132$	3
$10x + 3y = 195$	6
$2x + 11y = 127$	6
$3x + 5y = 81$	5
$4x + 7y = 113$	4
$12x + 5y = 238$	4

Mr Nelson has modelled the first question in the teaching video for today.
